June–Sept 2022 **Research Intern, Tencent AI Lab**, Bellevue, WA, USA.

◦ Enhanced **BERT** model performance by ~10% on extremely low-resource datasets through data augmentation, employing a task-dependent similarity matrix, with both this matrix and model weights optimized via a *meta-learning-based* approach.

May–Aug 2019 **Research Intern, Texas A&M University**, College Station, TX, USA.

*Halliburton Engineering Global Program Scholar*

◦ Developed a control algorithm for self-driving cars to navigate crowded environments by leveraging a pedestrian behavior model built with *Inverse Reinforcement Learning*.

May–Aug 2018 **Research Intern, L.V Prasad Eye Institute - Research Center**, Hyderabad, Telangana, India.

◦ Developed deep learning models for segmenting the optic disc and hard exudates in fundus images, and the choroid layer in OCT images. Built a web portal for doctors to access and utilize these tools.
